Fuel Oil 3.5% FOB Rotterdam Barges Average Price Options

Contract Specifications

Description	The 3.5% FOB RDAM Barges Fuel Oil Average Price Option is based on the underlying 3.5% FOB RDAM Barges Fuel Oil Future (BAR) and will automatically exercise into the settlement price of the Swap Future on the day of expiry of the options contract.
Contract Symbol	BAR
Hedge Instrument	The delta hedge for the 3.5% FOB Rotterdam Barges Average Price Option is the 3.5% FOB Rotterdam Barges Swap Future (BAR).
Contract Size	1,000 metric tonnes
Unit of Trading	Any multiple of 1,000 metric tonnes
Currency	US Dollars and cents
Trading Price Quotation	One cent ($0.01) per metric tonne
Settlement Price Quotation	One tenth of one cent ($0.001) per metric tonne
Minimum Price Fluctuation	One tenth of one cent ($0.001) per metric tonne
Last Trading Day	Last Trading Day of the contract month

Contract Specifications

Option Style	Options are Asian-style and will be automatically exercised on the expiry day if they are "in the money". The Swap Future resulting from exercise immediately goes to cash settlement relieving market participants of the need to concern themselves with liquidation or exercise issues. If an option is "out of the money" it will expire automatically. It is not permitted to exercise the option on any other day or in any other circumstances than the Last Trading Day. No manual exercise is permitted.
Expiry	16:30 London Time. Automatic exercise settings are pre-set to exercise contracts which are one minimum price fluctuation or more "in the money" with reference to the relevant reference price. Members cannot override automatic exercise settings or manually enter exercise instructions for this contract. The reference price will be a price in USD and cents per metric tonne based on the average of the assessment prices of the Platts 3.5% FOB RDAM Barges Swap Future for the contract month. When exercised against, the Clearing House, at its discretion, selects sellers against which to exercise on a pro-rata basis.
Option Premium / Daily Margin	The 3.5% FOB RDAM Barges Average Price Options are premium-paid-upfront options. The traded premium will therefore be debited by the Clearing House from the Buyer and credited to the Seller on the morning of the Business Day following the day of trade. Members who are long premium-paid-upfront options will receive a Net Liquidating Value (NLV) credit to the value of the premium which is then used to offset the initial margin requirement flowing from both these options and positions in other energy contracts. Members who are short premium-paid-upfront options will receive an NLV debit in addition to their initial margin requirement. NLV is calculated daily with reference to the settlement price of the option.
Strike Price Intervals	A minimum of 10 strikes above and below at the money in $1.00 increments will be listed at launch. This contract will support Custom Option Strikes with strikes in increments of $0.25 within a range of $150 to $900. These ranges may be revised from time to time according to future price movements. The at-the-money strike price is the closest interval nearest to the previous business day's settlement price of the underlying contract.
Contract Series	Up to 60 consecutive months
Final Payment Date	Two Clearing House Business Days following the Last Trading Day.
Business Days	Publication days for Platts European Marketscan
