

Five Year Mid-Curve Options on Euribor ® Futures

Contract Specifications

Description	Option which delivers into the three months Euribor futures contract expiring in five years' time.
Contract Symbol	K5
Unit of Trading	One Three Month Euribor Futures Contract
Contract Series	March, June, September, December, and four serial months, such that eight expiry months are available for trading, with the nearest six expiry months being consecutive calendar months.
Contract Standard	Assignment of one three month Euribor futures contract at the exercise price. The futures delivery month associated with each option expiry month shall be: March, the following five years, in respect of January, February and March expiry months; June, the following five years, in respect of April, May and June expiry months; September, the following five years, in respect of July, August and September expiry months; and December, the following five years, in respect of October, November and December expiry months.
Last Trading Day	Friday before the third Wednesday of the expiry month. On the Last Trading Day, trading in the expiring month will cease at 15:15.
Exercise Procedure	For quarterlies and serials, exercise by 17:00 on any business day, brought forward to 16:00 on the Last Trading Day. Exercise Price Intervals can be requested in 0.0625 (i.e. 0.0625%) and 0.1250, (i.e. 0.1250%) e.g. 94.0000, 94.0625, 94.1250, 94.1875, 94.2500 etc for all expiry months. For a detailed Euribor Options and Euribor Mid-Curve Options Strike Policy please see here
Delivery Date	Delivery on the first business day after the exercise day.

Contract Specifications

Minimum Price Fluctuation	0.0025 (€6.25)
Algorithm	Central order book applies a gradual time based pro-rata (GTBPR) matching algorithm with a time-weighting of 1 (ie the algorithm is effectively a priority pro-rata matching algorithm) with priority given to the first order at the best price subject to a minimum order size (collar) and limited to a maximum order size (cap).
Wholesale Trade Types	Block Trading, Asset Allocation Minimum Volume Thresholds can be found here
Additional Information	Potential users of the Options on Euribor Futures Contracts should familiarize themselves with the terms of these contracts and with the terms of the Underlying Futures Contract.
Option Premium	The contract price is not paid at the time of purchase. Option positions, as with futures position, are settled-to-market daily giving rise to positive or negative variation margin flows. When the Buyer exercises/abandons an option, the Buyer is required to pay the original contract price to the Exchange's Clearing Houser (CH) and the CH will pay the original option price to the Seller on the following business day. Such payments will be netted against the variation margin balances of Buyer and Seller by the CH.
