Contract Standard

Additional Information

Delivery may be made of any bonds on the List of Deliverable Euro-denominated Spanish Government Bonds in respect of a delivery month of an Exchange Contract, as published by the Exchange. All bond issues included in the List will have the following characteristics: Having terms as to redemption that provide for redemption of the entire Euro-denominated Spanish Government Bond issue in a single installment such that the length of time to the maturity date from the Delivery Day of the relevant delivery month is within the maturity range for the relevant Exchange Contract specified by the Board in the Contract Details; Having no terms permitting or requiring early redemption; Bearing interest at a single fixed rate throughout the term of the issue payable in arrears annually (except in the case of the first interest payment period which may be more or less than a year); Being denominated and payable as to principal and interest only in Euro and Eurocents; Not being callable; and Having an aggregate principal amount outstanding of not less than €5 billion which, by its terms and conditions, if issued in more than one tranche or tap or issue, is fungible.

Potential users of the European Government Bond Futures Contracts should familiarize themselves with the relevant Contract Terms and Administrative Procedures. Potential users should consider the risks of holding a position until the Last Trading Day of a Contract wherein they shall be buyers or sellers in the delivery process. In particular, they should familiarize themselves with the use of Price Factors and the EDSP price formation process as these are both constituents of the formula for the calculation of the invoicing amount.

NOTE: All times are London, unless otherwise stated
