No manual exercise is permitted.</p>
Option Premium / Daily Margin	<p>The Argus WTI Houston Average Price Option is a premium-paid-upfront option. Members who are long premium-paid-upfront options will receive a Net Liquidating Value (NLV) credit to the value of the premium which is then used to offset the initial margin requirement flowing from both these options and positions in other energy contracts. Members who are short premium-paid-upfront options will receive an NLV debit in addition to their initial margin requirement. NLV is calculated daily with reference to the settlement price of the option.</p>
