Contract Specifications

| | |
|-------------------------------|--|
| Option Style | Options are average priced and will be automatically exercised into the LPG FFA (BLPG) Future on the expiry day if they are "in the money". The Future resulting from exercise immediately goes to cash settlement relieving market participants of the need to concern themselves with liquidation or exercise issues. If an option is "out of the money" it will expire automatically. It is not permitted to exercise the option on any other day or in any other circumstances than the Last Trading Day. No manual exercise is permitted. |
| Option Premium / Daily Margin | The LPG FFA (BLPG) Average Price Option is a premium-paid-upfront option. The traded premium will therefore be debited by the Clearing House from the Buyer and credited to the Seller on the morning of the Business Day following the day of trade. Members who are long premium-paid-upfront options will receive a Net Liquidating Value (NLV) credit to the value of the premium which is then used to offset the initial margin requirement flowing from both these options and positions in other energy contracts. Members who are short premium-paid-upfront options will receive an NLV debit in addition to their initial margin requirement. NLV is calculated daily with reference to the settlement price of the option. |
| Expiry | <p>16:30 London Time.</p> <p>Automatic exercise settings are pre-set to exercise contracts which are one minimum price fluctuation or more "in the money" with reference to the relevant reference price. Members cannot override automatic exercise settings or manually enter exercise instructions for this contract.</p> <p>The reference price will be a price in USD and cents per metric tonne based on the average of the assessments as made public by the Baltic Exchange for the relevant route for each business day (as specified below) in the determination period.</p> |
| Strike Price Intervals | This contract will support Custom Option Strikes with strikes in increments of \$0.01 within a range of \$1 to \$25. This range may be revised from time to time according to future price movements. The at-the-money strike price is the closest interval nearest to the previous business day's settlement price of the underlying contract. |
| Floating Price | In respect of daily settlement, the Floating Price will be determined by ICE using price data from a number of sources including spot, forward and derivative markets for both physical and financial products. |
| Final Settlement | In respect of final settlement, the Floating Price will be a price in USD and cents per metric tonne based on the average of the assessments as made public by the Baltic Exchange for the relevant route for each business day (as specified below) in the determination period. |
| Contract Series | Up to 48 consecutive months or as otherwise determined by the Exchange. |
