# Contract Specifications

Strike Price Intervals	For all expiry months: 0.06250, (i.e. 0.06250%) eg 99.06250, 99.12500, 99.18750, 99.25000 etc etc...
Introduction of New Exercise Prices	A minimum of 25 Strike Prices in increments of "Exercise Price Intervals" above and below the at-the-money Strike Price. The "at-the-money" strike price is the closest interval nearest to the previous business day's settlement price of the corresponding underlying future. Strike Price boundaries are adjusted according to futures price movements. User-defined Strike Prices are allowed in the defined Exercise Price Intervals increments.
Algorithm	Central order book applies a gradual time based pro-rata (GTBPR) matching algorithm with a time-weighting of 1 and with priority given to the first order at the best price subject to a minimum order size (collar) and limited to a maximum order size (cap).
Option Premium	The contract price is not paid at the time of purchase. Option positions, as with futures position, are settled-to-market daily giving rise to positive or negative variation margin flows. When the Buyer exercises/abandons an option, the Buyer is required to pay the original contract price to the Exchange's Clearing House (CH) and the CH will pay the original option price to the Seller on the following business day. Such payments will be netted against the variation margin balances of Buyer and Seller by the CH.
Wholesale Trade Types	Block Trading, Asset Allocation Minimum Volume Thresholds can be found <a href="#">here</a>
Minimum Price Fluctuation	0.0025 (€6.25)
