Transforming global markets

ICE Clear Q2020 Quarterly Disclosure Call: Speakers

Chris Edmonds
Global Head of Clearing & Risk,
Intercontinental Exchange

Ashwini Panse
Chief Risk Officer,
North American Clearing Houses,
Intercontinental Exchange

Introduction

Intercontinental Exchange (ICE) owns and operates six clearing houses in North America, Europe and Asia.

Each quarter, clearing houses are required by IOSCO and the Committee on Payments and Market Infrastructures (CPMI) to publish disclosures¹. These provide transparency around the clearing house's financial resources during that quarter.

The disclosures are intended to help market participants and the public, to:

- compare CCP risk controls, including their financial condition and financial resources to withstand potential losses;
- have a clear, accurate and full understanding of the risks associated with a CCP;
- understand and assess a CCP's systemic importance and its impact on systemic risk in all jurisdictions and currencies for which it provides services; and
- understand and assess the risks of participating in CCPs

ICE recognizes the importance of operating highly transparent clearing houses such that all market participants have adequate information to fully understand the clearing process. ICE clearing houses comply with the regulatory disclosure requirements and additionally provide further public information where possible.

To complete the disclosures, ICE has significantly coordinated with other clearing houses via CCP12 and has actively led the effort to design and implement a computer friendly response template as well as led discussions to ensure consistency of responses across the clearing houses.

¹Committee on Payments and Market Infrastructures, Board of the International Organization of Securities Commissions, Public quantitative disclosure standards for central counterparties, <https://www.bis.org/cpmi/publ/d125.pdf>

Q2 2020 Highlights

- 390 + unique clearing members, thousands of clients across ICE Clearing Houses
- 406 Million USD in ICE Skin in the Game
- 250 Million USD in ICE Default Insurance protection layer that resides ahead of guaranty fund contributions of non-defaulting clearing members
- Collateral held remained over-collateralized at all times
- Zero Cover 2 or Liquidity Stress Testing Breaches
- Margin Coverage remained Regulatory Compliant
- No Defaults during the Quarter
- High Operational Availability

2Q20

Skin in the Game (SITG) & Default Insurance

ICE Default Resources

Notes:

- ICE Skin in the Game and Default Insurance Amounts reside in front of any Non-Defaulting Clearing Member Default Resources.
- ICE recently added a layer of default insurance to its layers of protection. The default insurance layer has been placed after and in addition to the Clearing House SITG contributions and the default insurance layer resides before the guaranty fund contributions of the non-defaulting clearing members. The default insurance has a three-year term commencing September 17, 2019 in the amount of \$75 million for ICE Clear Europe, \$50 million for ICE Clear Credit and \$25 million for ICE Clear U.S. Similar to SITG, the default insurance layer is not intended to replace or reduce the position risk-based amount of the guaranty fund.
- ICE Clear U.S. – Total Skin in the Game : \$103 million
 - Skin in the Game Contribution for Standard Contracts and Digital Currency Contracts - \$68 million
 - Additional Skin in the Game Contribution that can be used for Digital Currency Contracts only - \$35 million
- ICE Clear Singapore – Total Skin in the Game : \$3.38 million
 - Skin in the Game Contribution for Standard Contracts and Digital Currency Contracts - \$0.38 million
 - Additional Skin in the Game Contribution that can be used for Digital Currency Contracts only - \$3 million

ICNL	€ 3	€ 3	€ 3
ICE NGX	NA	NA	NA

% Total ICE Default Resources as compared to Participant Default Resources	2019 Q2	2020 Q1	2020 Q2
ICC	2.3%	3.5% ↑	3.2%
ICEU CDS	3.7%	8.1% ↑	9.3%
ICEU F&O	5.7%	8.0% ↑	8.2%
ICUS	13.9%	14.0% ↑	14.0%
		*19.3% ↑	*19.3%
ICSG	33.3%	32.8.0% ↑	32.8%
ICNL	62.5%	*291.4% ↑	*291.4%
ICE NGX	NA	NA	NA

Notes:

- * Includes the Skin in the Game Contribution for Standard Contracts and Digital Currency Contracts
- ICE NGX is a CCP with a self funded default fund and does not require default fund contributions from its contracting parties.

Default Resources – Stress Testing

ICE Cover 2 Stress Losses in comparison to Prefunded Default Resources

Cover 2 Stress Loss is the estimated largest aggregate stress loss (in excess of initial margin) that would be caused by the default of any two members and their affiliates in extreme but plausible market conditions.

Cover 2 Estimated Stress Loss Exceedance:	2019 Q2	2020 Q1	2020 Q2
	# of Days and Amount		
ICC			
ICEU CDS			
ICEU F&O			
ICUS			
ICSG			
ICNL	No Open Interest during the previous 12 months		
ICE NGX	Not Applicable		

ZERO

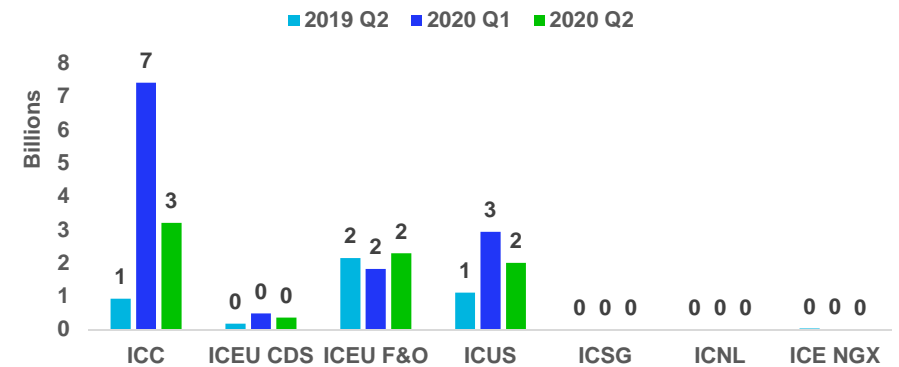

“None of ICE’s Clearing Houses have experienced a breach of its Cover 2 Default Resource Requirement since the inception of the Public Quantitative Disclosures in September 2015”

Margins

Total Initial Margin Required at Quarter End

Peak Total Initial Margin Call during the Quarter

Peak Total Variation Margin during the Quarter

Total Initial Margin Required (in millions)	2019 Q2	2020 Q1	2020 Q2
ICC	\$ 33,437 M	\$ 50,336 M ↑	\$ 49,244 M
ICEU CDS	\$ 6,227 M	\$ 10,223 M ↑	€ 10,857 M
ICEU F&O	\$ 41,123 M	\$ 57,255 M ↑	\$ 62,789 M
ICUS	\$ 15,232 M	\$ 30,665 M ↑	\$ 25,792 M
ICSG	\$ 0.1 M	\$ 0.2 M ↑	\$ 0.2 M
ICNL	€ 0	€ 0	€ 0
ICE NGX	CAD 741 M	CAD 1,015 M ↑	CAD 1,047 M

Back-Testing of Initial Margin

Peak Breach Amount - 12 Months

Number of Breaches

Achieved Coverage Level - 12 Mos. (in millions)	2019 Q2	2020 Q1	2020 Q2
ICC	100.00%	99.72%	99.63%
ICEU CDS	100.00%	^^98.13%	97.72%
ICEU F&O	99.86%	99.70%	99.70%
ICUS	99.99%	99.97%	99.97%
ICSG	100.00%	99.74%	99.72%
ICNL	NA	NA	NA
ICE NGX	99.40%	99.90%	99.90%

^^ This number is computed using a 1yr horizon, includes overlapping breaches and includes accounts with statistically insignificant numbers of observations. Note that 1yr horizon for 5 or 7 day MPOR accounts including overlapping observations is effectively 52 or 37 independent observations, and hence not statistically sound or meaningful. The regulatory requirement of 99.5% should be applied to a back-testing time horizon that is appropriate for the margin period of risk that is applicable for the product, which in this case is 5 or 7 days. Note that under the Basel Traffic Light System metrics, where a more statistically meaningful methodology over a longer period is used; the margin methodology meets the regulatory requirements.

Liquidity

Available Liquid Resources at Quarter End

Available Liquid Resources (in millions)	2019 Q2	2020 Q1	2020 Q2
ICC	\$ 22,740	\$ 40,634 ↑	\$ 38,868

Quarterly Clearing Disclosures

Public quantitative disclosure standards^[1] for central counterparties

Each quarter, clearing houses are required by IOSCO and the Committee on Payments and Market Infrastructures (CPMI) to publish disclosures. These provide transparency around the clearing house's financial resources during that quarter.

The disclosures are intended to help market participants and the public, to:

- compare CCP risk controls, including their financial condition and financial resources to withstand potential losses;
- have a clear, accurate and full understanding of the risks associated with a CCP;
- understand and assess a CCP's systemic importance and its impact on systemic risk in all jurisdictions and currencies for which it provides services; and understand and assess the risks of participating in CCPs

You can find out more information about each of the disclosures here: <https://www.bis.org/cpmi/publ/d125.pdf>
