

Thomson Data Feeds

Flexible and Programmatic Access to Thomson's Universe of High-Quality Financial Data

Key features:

- Thomson has the highest quality brands in the market with global coverage
- A range of technical solutions designed to meet the specific requirements of each financial segment
- Symbology resolution across industry standard and bespoke symbologies

Key benefits:

- Simplifies your data integration requirements by sourcing a wide range of data from a single, integrated, reputable provider
- Minimises implementation costs and ensures fast delivery of in-house solutions to your end-users by using the most appropriate technologies for your requirements
- Provides security in the knowledge that you are using fully supported, resilient and quality-checked data and systems

Thomson Financial's data universe covers all asset classes, ranging from real-time, tick-by-tick prices to historical data, going back over 40 years. Also available is a wealth of estimates, fundamental and derived data.

Thomson Data Feeds is a suite of powerful technology solutions for all data-enabled applications, from the front office through to the back office. It provides a selection of technical solutions ranging from APIs to bulk-data delivery, tailored to your requirements, whichever part of the industry you work in.

Thomson data sources through Thomson Data Feeds

- Real-time and delayed pricing quotes from over 150 equity and derivative exchanges globally.
- Real-time news from over 40 providers including Dow Jones, AFX and a range of specialist sources.
- Global historical financial instrument pricing, economics and time-series data from Thomson Datastream. Provides up to 40 years of history for wide range of financial asset classes for developed and emerging markets globally.

- Company profile, financial statements (standardised and as reported), accounting results and per-share data from Thomson Worldscope and Thomson Extel. Covers over 30,000 active and 13,000 inactive companies, representing more than 57 established and emerging markets and covering nearly 95% of the world's stockmarket value.
- Current and historical summary and detailed analyst forecasts and recommendations from Thomson I/B/E/S. Contributions come from over 600 brokers covering approximately 12,000 companies across 50 countries.
- Research documents and broker notes. Also earnings, sales, target prices and detailed recommendations from First Call. Research from 600 brokerage firms worldwide to cover over 34,000 companies in 130 countries.
- Unique global institutional ownership and contact data. Provides ownership details on 39,400 mutual, pension and insurance funds and more than 117,400 owners of over 33,800 stocks.
- Global Capital Markets and M&A transactional information back to 1970s for 19 global transaction types. Covers over 1.2 million transactions with over 7,500 data items for more than 220 countries.

There are additional data sources available; all are quality-data sources on which the financial community relies through Thomson's desktop products.
