

ICE Quote Select Product Summary

02 January 2024

1. Introduction

ICE Quote Select provides market participants with an enhanced workflow to anonymously discover counterparties interested in trading nascent contracts and tenors where traditional sources of liquidity cannot facilitate price discovery and trading liquidity.

All trades agreed using the ICE Quote Select functionality will be submitted as Block Trades and accepted by the Exchange contingent on meeting all applicable Exchange Rules, including minimum volume and price reasonability requirements.

A list of ICE Futures Europe Contracts enabled for ICE Quote Select functionality can be found below.

Participants interested in utilizing the functionality should contact an Exchange Oil Sales Representative for further information.
