INTRODUCTION

Open-Close summary data are files for trading activity on the NYSE ARCA and NYSE AMERICAN exchanges. The data is available in 1-minute summary intervals, 10-minute summary intervals or as an end-of-day summary. The files aggregate the volume by counterparty type (i.e. customer, professional customer, broker-dealer, and market maker), buying/selling and opening/closing criteria. The customer and professional customer volume are further broken down into trade size buckets (fewer than 100 contracts, 100-199 contracts, greater than 199 contracts).

The following trade types are not captured in the product:

- Test Symbols
- Intraday Busted Trades
- Prior Day Cancellations

10-minute Summary Intervals

- Intraday data is available from August 2022 and November 2023 for NYSE ARCA and NYSE AMERICAN, respectively.

1-minute Summary Intervals

- Intraday data is available from October 2026 for both NYSE ARCA and NYSE AMERICAN.

End-of-Day data is available from December 2018 for both NYSE ARCA and NYSE AMERICAN.
