Submission No. 26-107
September 11, 2026

Mr. Christopher J. Kirkpatrick
Secretary of the Commission
Office of the Secretariat
Commodity Futures Trading Commission
Three Lafayette Centre
1155 21st Street, NW
Washington, DC 20581

Re: New OKX Bitcoin USD Nano Futures Contract (4 of 6)
Submission Pursuant to Section 5c(c)(1) of the Act and Regulation 40.2

Dear Mr. Kirkpatrick:

Pursuant to Commission Regulation 40.2, ICE Futures U.S., Inc. ("Exchange" or "IFUS") submits, by written certification, new Chapters 33 and 35, amendments to Rules 4.25 and 6.25 (Resolution No. 1 to Chapter 6), and the amendments to the Internal Price Limit, Reasonability Limit and No-Cancellation Range tables set forth in Exhibit B, which provide for the listing of six new cash-settled futures contracts which are based on the prices of digital assets traded on OKX and the ICE USDX®.

A. Contract Terms and Conditions

The Exchange is launching the new futures contracts based on the OKX Spot Rates and ICE USDX® listed below. Complete specifications for the new contracts are included in Exhibit A.

Futures Contract Name	Contract Size	Minimum Tick (Index Points)	All-Month Accountability Level (Single Month)	Spot Month Position Limit
OKX Bitcoin USD Futures ("OBT")	1 times the OKX Bitcoin USD Spot Rate	$5.00 per Bitcoin, equal to $5.00 per contract.	65,000 (65,000)	65,000
OKX Ether USD Futures ("OET")	10 times the OKX Ether USD Spot Rate	$0.50 per Ether, equal to $5.00 per contract.	100,000 (100,000)	40,000
OKX WLD USD Futures ("OWL")	2,000 times the OKX WLD USD Spot Rate	$0.0001 per WLD, equal to 0.20 per contract.	5,500 (5,500)	5,500
OKX Bitcoin USD Nano Futures ("OBN")	0.01 times the OKX Bitcoin USD Spot Rate	$5.00 per Bitcoin, equal to $0.05 per contract.	6,500,000 (6,500,000)	6,500,000

ICE Futures U.S. Inc.
1345 6th Avenue (Avenue of the Americas)

ice.com

ICE Futures US, Inc. a designated contract market under the Commodity Exchange Act, as amended.

OKX Ether USD Nano Futures ("OEN")	0.10 times the OKX Ether USD Spot Rate	$0.50 per Ether, equal to $0.05 per contract.	10,000,000 (10,000,000)	4,000,000
Micro USDX® Futures ("MDX")	$100 times the USDX	$0.01 per Index point, equal to $1.00 per contract.	10,000 (10,000)	N/A

The Exchange will list 6 consecutive monthly expirations for the new OKX contracts and quarterly expirations (March, June, September and December) for the Micro USDX Futures. Trading shall be open from 8:00pm (6:00pm on Sunday evening) to 6:00pm the following day. The daily settlement windows shall occur between 3:59pm to 4.00pm ET for the OKX-based contracts and between 2:59 to 3:00 PM ET for the Micro USDX Futures. The OKX-based contracts will cease trading at 4:00pm London Time on the last Friday of the expiration month, at which point they will cash settle to the value calculated by the Exchange of the weighted average of traded prices in the OKX Spot Rate feed for the applicable spot market during the five-minute period ending at 4:00 pm London Time. The Micro USDX Futures will cease trading two Business Days prior to the third Wednesday of the contract month. Trading in the expiring contract ceases at 10:16 am ET time on Last Trading Day. Further information is provided in the contract specifications provided in Exhibit A. Additionally, it is the Exchange's good faith belief that the above-referenced futures contracts do not meet the definition of *referenced contract* as prescribed in CFTC Regulation §150.1.

The new OKX contracts are subject to the position limit and/or position accountability levels that are set forth in Exchange Rule 6.25 and amended Resolution No. 1 to Chapter 6, attached in Exhibit B. Participants exceeding the accountability levels of the new contracts: (i) automatically consent not to increase further and to decrease those positions when so ordered by the Exchange acting in its own discretion and (ii) shall provide, in a timely manner, information on the nature of that participant's related cash position, Exchange Futures and Options position, trading and/or hedging strategy, and such other relevant information as the Exchange may require.

B. Background on OKX Holdings Corporation

OKX is a Seychelles-headquartered global cryptocurrency exchange that has been operating since 2016, serving retail and institutional investors in over 100 countries. It began as a crypto exchange giving millions access to crypto trading and has grown into one of the largest platforms in the world, also developing one of the most widely used Web3 wallets for accessing decentralized applications. OKX spot prices are widely used as reference rates across the industry and OKX employs numerous price limits and market protections within its spot markets to minimize the likelihood of market disruptions.

C. Underlying OKX Spot Markets and USDX®

The new futures contracts are based on the respective OKX Spot Rate for each digital asset, as well as the ICE USDX®. The OKX Spot Rate provides a real-time, USD-denominated reference rate price for each digital asset. The OKX-based futures contracts' final settlement prices utilize the OKX Spot Rates, which reference trade prices in the applicable spot markets during the five-minute period ending at 4:00 pm London Time.

The circulating supply of the digital assets underlying the Exchange's futures contacts is robust. The Exchange notes the availability of access to the digital assets at multiple trading venues. Additionally, the underlying digital assets are readily available in widely accepted payment channels. Based on pricing as of August 31, 2026, the approximate notional value for the futures contract corresponding to each digital asset is (as well as the notional value for the Micro USDX Future):

OKX Bitcoin USD Futures ("OBT")	$78,739
OKX Ether USD Futures ("OET")	$24,663
OKX WLD USD Futures ("OWL")	$715
OKX Bitcoin USD Nano Futures ("OBN")	$787
OKX Ether USD Nano Futures ("OEN")	$246
Micro USDX® Futures ("MDX")	$9,938

The USDX is a geometrically averaged calculation of six currencies weighted against the U.S. dollar and is calculated in real time using the spot prices of the USDX's component currencies (Euro, Japanese Yen, British Pound, Canadian Dollar, Swedish Krona, and Swiss Franc). The prices used for the calculation of the USDX are the mid-points between the latest available bid and offer in the component currencies as sourced from ICE Data Derivatives.

Certifications

New Chapters 33 and 35 and the amendments to Rules 4.25 and 6.25, which provide for the listing of the OKX and Micro futures contracts, will become effective on such date as the Exchange shall determine, which shall be no sooner than the second business day following the business day on which such submission was received by the Commission. The Exchange has reviewed the designated contract market core principles ("Core Principles") as set forth in the Act and has determined that the amendments comply with the following relevant Core Principles:

COMPLIANCE WITH RULES (Principle 2): The terms and conditions of the new OKX and Micro futures contracts are set forth in new Chapters 33 and 35, amendments to Rules 6.25, Chapter 4 regarding trading hours (Rule 4.25) and will be enforced by the Exchange. In addition, trading of the contracts is subject to all relevant Exchange rules which are enforced by the Market Regulation Department.

CONTRACTS NOT READILY SUBJECT TO MANIPULATION (Principle 3): The new OKX and Micro futures contracts are not readily subject to manipulation as they are based on established and liquid underlying cash markets in compliance with CFTC Regulation 38.200. The deliverable supplies underlying such contracts are abundant and readily-available in the cash markets at multiple trading venues. In addition, trading of the contracts will be monitored by the Market Regulation Department.

PREVENTION OF MARKET DISRUPTION, PROTECTION OF MARKETS AND MARKET PARTICIPANTS (Principles 4 and 12): The contracts listed for trading by the Exchange are subject to prohibitions against abusive and disruptive trading practices as set forth in Chapter 4 of the Rules. The Exchange's Market Regulation staff actively monitors all Exchange markets to detect and sanction abusive practices. In addition, the OKX and Micro USDX futures contracts have interval price limits which act to temper the rate of price moves during a trading session. Such limits are provided in the contract specifications within Exhibit A.

POSITION LIMITS OF ACCOUNTABILITY (Principle 5): Positions in the new OKX futures contracts will be subject to the single and all-month-combined accountability levels and spot month position limits set by the Exchange, where applicable, which are based upon deliverable supply in the cash market or the limits of similar futures listed by the Exchange or another designated contract market. Where applicable, a deliverable supply analysis accompanies this submission as Exhibit C. The Exchange will apply single and all-months-combined accountability levels to the Micro USDX Futures contract, similar to the Exchange's existing US Dollar Index Futures ("DX") contract, and based on the treatment of other major foreign currency futures contracts listed by other designated contract markets.

AVAILABILITY OF GENERAL INFORMATION/ DAILY PUBLICATION OF TRADING INFORMATION (Principles 7 and 8): Prior to the commencement of trading, the terms and conditions for the OKX and Micro futures contracts will be available on the Exchange's website. In addition, the Exchange will publish on a daily basis the settlement prices, volume, open interest and the opening and closing ranges for the contracts.

DAILY PUBLICATION OF TRADING INFORMATION (Principle 8): The Exchange will publish on its website and distribute through quote vendors trading volume, open interest levels, and daily price information for OKX and Micro futures contracts as it does for other Exchange futures contracts.

EXECUTION OF TRANSACTIONS (Principle 9): The new contracts will be listed on the Exchange's electronic trading platform which provides a competitive, centralized market for transparent execution of transactions. In addition, the Exchange will permit certain noncompetitive transactions pursuant to existing Exchange Rules.

RECORDKEEPING AND TRADE INFORMATION (Principle 10): The Exchange has rules and procedures in place to provide for the recording and storage of the requisite trade information sufficient for the Market Regulation Department to detect and prosecute customer and market abuses.

FINANCIAL INTEGRITY OF CONTRACTS (Principle 11): The new OKX and Micro futures contract will be cleared by ICE Clear U.S., a registered derivatives clearing organization subject to Commission regulation, and carried by registered futures commission merchants qualified to handle customer business.

PROTECTION OF MARKETS AND MARKET PARTICIPANTS (Principle 12): Exchange Rules set forth numerous restrictions that preclude intermediaries from disadvantaging their customers. These are applicable to competitive trading in the OKX and Micro futures contract and are policed by the Market Regulation staff.

DISCIPLINARY PROCEDURES (Principle 13): Pursuant to Chapter 21 of the Rules which sets forth the Exchange's disciplinary procedures, and Rule 4.00 setting forth the Exchange's jurisdiction over all market participants, the Market Regulation Department and the Business Conduct Committee have the authority to sanction, suspend or expel members and market participants that violate Exchange rules.

DISPUTE RESOLUTION (Principle 14): Market participants may arbitrate claims arising from trading of the OKX and Micro futures contracts in accordance with Chapter 20 of the Rules. Such arbitration is mandatory on the part of a member against which a customer

elects to use the Exchange's arbitration forum; member to member claims are subject to mandatory arbitration to the extent related to Exchange transactions.

The Exchange is not aware of any opposing views expressed regarding listing of the OKX and Micro futures contracts and the adoption of related rules, and certifies that concurrent with this filing a copy of this submission was posted on the Exchange's website, which may be accessed at: (https://www.theice.com/futures-us/regulation#rule-filings).

Sincerely,

Jason V. Fusco
General Counsel
ICE Futures U.S., Inc.

CHAPTER 33

OKX FUTURES

33.1 Scope of Chapter

This chapter is limited in application to trading of OKX Futures Contracts. The procedures for trading, clearing, settlement, and any other matters not specifically covered herein shall be governed by the general Rules of the Exchange and the applicable Clearing Organization.

Pursuant to the terms of the license granted by OKX to the Exchange, the Exchange shall use spot pricing data for transactions executed on OKX to calculate the value for Futures specified in this Chapter.

The terms and conditions of the OKX Futures Contracts specified in this Chapter are deemed to include any relevant governmental, regulatory or court decree or order as recognized by the Exchange in a Notice to Members.

33.2 Months Traded

In the absence of any other provisions in the respective Sub-Chapter for a particular OKX Futures Contract, trading in the OKX Futures Contracts may be conducted in all 12 delivery months. The number of months open for trading at a given time shall be determined by the Exchange.

33.3 Last Trading Day

In the absence of any other provisions in the respective Sub-Chapter for a particular OKX Futures Contract, the last day of trading for each OKX Futures Contract shall be the last Friday of the contract month.

33.4 Cash Settlement Procedures

(a) Settlement

OKX Futures Contracts open at the termination of trading shall be cash settled as set forth in paragraph (c) of this Rule using the Final Settlement Value for the respective digital asset. The Final Settlement Value shall be calculated by the Exchange using the weighted average of all prices for all trades in the relevant OKX spot market the ("OKX Spot Price") during the five-minute period ending at 4:00 pm London time on the Last Trading Day of an Expiring OKX Contract. The Final Settlement Price for the purposes of the OKX Futures Contract's cash settlement shall be rounded to the nearest 0.01

(b) Spot Data Not Published/Unexpected Market Closure Event

In the event that the relevant OKX spot market data on which the Final Settlement Value of any OKX Futures Contract is based is not published on the Last Trading Day for any reason, then the

Exchange, in its sole and absolute discretion, may either (i) publish a Final Settlement Value on such day using such pricing data as it deems reliable, or (ii) delay issuing a Final Settlement Value and shall publish a Final Settlement Value as soon as practicable using such pricing data as it deems reliable, in accordance with Rule 4.34.

(c) Final Settlement Payment

Payment in final settlement of a OKX Futures Contract will be made in accordance with the Clearing Organization Rules on the second Business Day following the termination of trading by Clearing Members with open positions at the time of termination of trading of the OKX Futures Contract. The amount of the final settlement payment to be made or received will be calculated based on the final settlement value as a normal variation payment.

33.5 Notice Regarding OKX Indices

The only relationship that OKX Holdings Corporation has with the Exchange in respect of OKX Futures Contracts is the licensing of the spot transaction data, The OKX Futures Contracts are not sponsored, endorsed, sold, or promoted by OKX. OKX makes no representation or warranty, express or implied, regarding the advisability of investing in or otherwise acquiring the OKX Futures Contracts or the advisability of investing in securities, derivatives (including futures and options) or digital assets generally or the ability of the Rate to track corresponding or relative market performance. OKX has not passed on the legality or suitability of the OKX futures with respect to any person or entity.

The licensing agreement between the Exchange and OKX is solely for the benefit of the Exchange and OKX and not for the benefit of the owners or holders of the OKX Futures Contracts or any other third parties.

Sub-Chapter A - OKX FUTURES CONTRACTS

33.A.001 OKX BITCOIN USD FUTURES

Trading Schedule

The hours of trading in OKX Bitcoin USD Futures shall be determined by the Exchange. On the last day of trading in an expiring future, the closing time for such future shall be 4:00 p.m. London time.

Trading Unit

ICE Futures U.S.®, Inc.

MICRO FUTURES

35.1 Scope of Chapter

This chapter is limited in application to trading Micro Futures Contracts. The procedures for trading, clearing, settlement, and any other matters not specifically covered herein shall be governed by the general Rules of the Exchange.

The terms and conditions of the Futures Contracts specified in this Chapter are deemed to include any relevant governmental, regulatory or court decree or order as recognized by the Exchange in a Notice to Members.

35.2 Trading Specifications

In the absence of any other provisions in the respective Sub-Chapter for a particular Micro Index Futures Contract, trading in the Futures Contracts shall be conducted in March, June, September and December delivery months. The number of months open for trading at a given time shall be determined by the Exchange.

35.3 Cash Settlement Procedures

(b) Settlement

In the absence of any other provisions in the respective Sub-Chapter for a particular Micro Futures Contract, Micro Futures Contracts open at the termination of trading shall be cash settled as set forth in paragraph (b) of this Rule using the Final Settlement Value as provided in the Sub-Chapter for the respective Futures Contract.

(c) Final Settlement Payment

Payment in final settlement of a Micro Futures Contract will be made in accordance with the Clearing Organization Rules on the Business Day following the termination of trading by Clearing Members with open positions at the time of termination of trading of the Futures Contract. The amount of the final settlement payment to be made or received will be calculated based on the final settlement value as a normal variation payment.

35.4 Trading Halts on Underlying Securities Exchange

On any Business Day when a general trading halt occurs on the New York Stock Exchange, Inc. ("NYSE") pursuant to NYSE Rule 7.12, or any other relevant national securities exchange that is the primary securities market for the index underlying a NYSE Index Contract, trading in the relevant Micro Futures Contracts on the NYSE Index shall be halted. If trading in the primary securities market is scheduled to resume after a trading halt pursuant to NYSE Rule 7.12 or similar rule of another relevant national securities exchange on the same Business Day as the trading halt in that market occurred, trading in the relevant Contract shall resume ten minutes after the trading halt in the primary securities market commences. If trading in the primary securities market is not scheduled to resume on the same Business Day as the trading halt in that market occurred, then trading in the relevant Contracts shall resume at the regular open time for the Index Contracts on the next Business Day.

35.A.04 MICRO USDX Index Future

Trading Schedule

The hours of trading in MICRO USDX Index Futures Contracts shall be determined by the Exchange. On the last day of trading in an expiring future, the closing time for such future shall be 10:16 a.m. New York time.

Trading Unit

The unit of trading shall be $100.00 times the USDX.

Last Trading Day

The Last Trading Day of an expiring Micro USDX Futures Contracts month shall be the second (2nd) Business Day prior to the third (3rd) Wednesday of the contract month. If that day is a bank holiday in New York, New York, then the Last Trading Day Micro USDX Futures Contracts shall be the preceding Business Day.

Final Settlement Value

The final settlement value for purposes of the contract's cash settlement shall be the Final Settlement Value of the same contract month in the full size USDX Futures Contract.

Price Increments

The Minimum price fluctuation for the Micro USDX Futures shall be 0.0010 Index Points. The dollar value of the Minimum price fluctuation shall be $1.00. Contracts shall not be made on any other price basis with the exception of certain Block Trades as may be specified by the Exchange, in which case the Minimum price fluctuation shall be 0.001 Index Points, which is $0.10 per contract.

Rule 4.25. Trading Hours

(a) The Exchange may host one or more daily trading sessions for each Exchange Commodity Contract. The ETS hours for each trading session shall be as specified by the Exchange from time to time; and the pre-open, open and close for each trading session shall follow the procedures set forth in Rules 4.22 through 4.24 of this Chapter.

(Unless otherwise specified, all times in this Rule shall refer to the prevailing time in New York City on the relevant day and shall be referred to as Eastern Prevailing Time or "EPT".)

(b) The time period during which daily Settlement Prices shall be determined is:

***

(xvi) for CoinDesk and OKX futures and Options contracts between 3:59 PM and 4:00 PM.

[REMAINDER OF RULE UNCHANGED]

Rule 6.25. Position Limits for Index and Crypto Contracts

(a) Position limit and position accountability levels for Index Contracts are specified in the Table contained in Resolution 1 contained in this Chapter (the "Position Limit Table"). A Person holding or controlling Exchange Futures Contracts and Futures Equivalent Contracts, net long or net short (calculated as specified in the Position Limit Table), in an amount equal to or greater than the accountability levels specified in such Table, (i) automatically consents not to increase further and automatically consents to decrease those positions when so ordered by the Exchange acting in its own discretion and (ii) shall provide, in a timely manner, information on the nature of that Person's related cash position, Exchange Futures and Options position, trading strategy and/or hedging strategy and such other relevant information as the Exchange may require. Nothing in this Rule shall limit the authority of the Exchange to take action under Rules 6.11, 6.12 and 6.13 or to request and collect information regarding such Person's related cash and Exchange Futures and Options positions.

(b) In accordance with paragraph (a) of this rule, the spot month position limits for CoinDesk and OKX contracts shall be effective on the Last Trading Day and the two Business Days preceding the Last Trading Day of the expiring contract, or as otherwise determined by the Exchange to account for holidays.
